

Breakout Room 1

- Clinic/Event ideas HI
- Pickup games vs registered events
- Rules modifications
- Discuss possible vaccine survey for leagues

**room 1
rules!**

interesting: some pickup groups are playing invitation only, vaccine only

Suggestion: clinics, covid safe game, skills, footwork, covid-safe drills

pickup: what is the alternative for someone not wearing a mask? how do we accommodate someone who won't or can't wear a mask?

**good feelings
about starting
with fall beach**

**Rule mod:
unclear about
how ways to
modify the
game's rules
at all**

Survey: It is not illegal to ask "are you vaccinated?" it is illegal to interrogate personal details (HIPAA) you can have waivers asking about vaccine - make sure to add clause that we will not publish results

interesting: contact tracing - in terms of severe cases (hospitalized), less than 10% trace from outside events

**Suggestion:
Start
programming
with Octimate
or Goaltimate**

Survey: would feel better knowing the percentage of people playing in the league vaccinated

Interesting: college ultimate playing pickup with masks, not too bad

**suggestion:
create surveys
specific to
each league**

Breakout Room 2

- Clinic/Event ideas
- Pickup games vs registered events
- Rules modification
- Discuss possibilities for leagues

survey asking if players are vaccinated before event starts -- could be used to decide if masks are required.

AUDL - if 85% is vaxxed, then masks not required or optional (something like that)

rather play ultimate than do drills/clinics

try another survey to see vaccination rates now

hopeful that we could play regular, unmasked games July.

moving marks / rule changes like that make it hard to play defense

Maybe smaller games of 6v6 or 4v4

ask people who aren't feeling well to not come and have sub list?

Registered events create safer bubble vs pickup where anyone can join

playing with masks covers if people are vaccinated or not

Regional / localized hat league

Most in our group wishes for a more "normal" summer league if fields can be reserved in July

Have beach events over summer leading up to Fall League

Breakout Room 3

- Clinic/Event ideas
- Pickup games vs registered events
- Rules modifications
- Discuss possible vaccine survey for leagues

Recalibrate our bodies

Slowly coming back

conditioning

body control

Maybe July we use for conditioning and pre-hab

Other community building events to connect and reconnect

Masks not needed if yellow tier says so?

Maybe August some community pickups; especially women's pickup!

Maybe August/Sept a 4v4 league

INFO

Case rates more important than vaccination rate

Some pickup games are mandating masks currently

Vaccination Survey Question

Can we do anything with the data if we do ask about vaccination?

Mitigating risky events? Collecting data in case there's a breakout to better inform our community and make future decisions?
